Let's Start!

Do you recycle?

Learning Outcome

Identify and describe issues in written and spoken situations according to social contexts.

Can Do Statements

- I can talk about domestic activities.
- I can explain how to do things.
- I can ask for clarification.

Ask your partner:

- What pollution problems need to be addressed in your country?
- How important is recycling to you, your community and your country?

Let's Explore!

Litter* has been piling up in our cities and natural areas.

* "Litter" is anything you throw on the ground.

Instructions: Read the text aloud.

There has never been a better time to start caring for the environment, has there? Is that not what scientists are saying? With the increasing number of cars, factories, and even people, the environment is in danger. Obviously, we have not been doing what we were supposed to be doing or there wouldn't be a crisis!

We were supposed to recycle. You haven't been neglecting this, have you? Recycling paper saves trees. Is that not what we all want? When you wipe up the kitchen, use a washable cloth instead of paper towels. You don't need to throw away more and more paper, do you? You were supposed to take all of your recyclables out of the weekly trash, too! You did that, right? Aren't you unhappy about adding more chemicals to our water supply? If you wanted to make an effective cleaner to wash counters and floors, you could mix vinegar, water and a tiny bit of dish soap. Don't forget, you were going to put it in a refillable plastic bottle as well! There will be less plastic to recycle!

Another thing we were all supposed to be doing to help the environment was not litter. Isn't that what we have all been taught? Unfortunately, litter has been piling up in our cities and natural areas. We should remind other people not to litter too. Can they not see why it's important? Finally, your car. You were going to spend less time driving and more time walking. You have, haven't you?

Let's Practice!

Caring for the environment ...

Instructions: Read the expressions. Choose the correct expression to ask for clarification from the word bank to correctly complete the sentences.

Work Bank

- has there
- do you
- is it
- have you

1. There has never been a better time to start caring for the environment, _____?
2. You haven't been neglecting this, _____?
3. You don't need to throw away more and more paper, _____?
4. That isn't what we have all been taught, _____?

Let's Practice!

We are supposed to ...

Instructions: Draw a line to match the sentences in Column A and Column B. When you complete the sentences, read the sentences aloud with your partner. Check your pronunciation with your instructor.

COLUMN A

1. What we were supposed to _____ or there wouldn't be a crisis.
2. We were supposed to _____.
3. You were supposed to _____ all of your recyclables out of the weekly trash, too!
4. Another thing we were all supposed to be doing to _____ the environment was not litter.
5. You were going to _____ less time driving and more time walking.

COLUMN B

- a. spend
- b. be doing
- c. help
- d. take
- e. recycle

Extension Activity

Make posters to help save the environment.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Choose two things you want to make posters for addressing pollution problems (water pollution, litter, recycling, exhaust pollution ...).
- Make up two separate posters linking domestic activities to the pollution problems.
- Explain how to change things.
- Use questions asking for clarification on the poster.
- Bring your posters to class and put them up with other posters.
- Read posters that other students have created.

Self-Assessment

Yes No

I create two posters dealing with pollution linked with domestic activities.

☐ ☐

I explain how to change things, using: 'be supposed to', 'was/were supposed to', and 'was/were going to'.

☐ ☐

I use questions for clarification with 'not'.

☐ ☐

I put my posters up in the class and I read other posters.

☐ ☐

Target Words

- **to recycle** (verb): to treat or process to reuse
e.g. We were supposed to recycle.
- **environment** (noun): the aggregate of surrounding things, conditions, or influences
e.g. There has never been a better time to start caring for the environment, has there?
- **washable** (adjective): that can be washed
e.g. When you wipe up the kitchen, use a washable cloth instead of paper towels.
- **recyclables** (noun): things that can be used again
e.g. You were supposed to take all of your recyclables out of the weekly trash, too!
- **litter** (noun): trash; garbage
e.g. Unfortunately, litter has been piling up in our cities and natural areas. We should remind other people not to litter too.

Learning Points

The Position of **Not**

When you want to emphasize that something or an action is opposite to what is expected, use *not*, rather than a contraction in the sentence.

For example:

*Otherwise things will **not** change, will they?*

The **not** shows a firmness on the part of the speaker while still being polite.

When speaking, the **not** is pronounced louder and longer than it is normally.

Examples:

- *Is that not what we all want?*
- *We should remind other people not to litter too.*
- *Is that not what scientists are saying?*
- *Obviously we have not been doing what we were supposed to be doing.*

Learning Points

Explaining How Things Were Done

You use *be supposed to* and *was going to* to explain how things were done.

You use the structure **be supposed to** when you want to talk about expectations, obligations or arrangements. You can use this structure using the Past tense to talk about things that you were obligated to do, but didn't or couldn't do.

The structure is:

Subject + To be + *supposed to* + verb

Another thing **we were all supposed to be doing** to help the environment was not litter.

****Pronunciation tip**:**

When you say *be supposed to*, you link the /d/ and /t/ sounds together.

Like this: Be suppose_to

You use the structure **was going to** when you want to talk about things that you had planned or intended to do.

The structure is:

was/were + *going to* + verb

You **were going to spend** less time driving and more time walking.

Examples:

- *We were supposed to recycle.*
- *You were supposed to take all of your recyclables out of the weekly trash, too!*
- *Obviously we have not been doing what we were supposed to be doing or there wouldn't be a crisis!*
- *You were going to spend less time driving and more time walking.*
